- The diagram illustrates a three-step assembly process for a LEGO structure:

  - Step 1:** Shows a red 1x8 brick at the bottom and a green 1x8 brick positioned above it. A green arrow points from the top of the red brick down to the top of the green brick.
  - Step 2:** The green brick is now attached to the top of the red brick. A green arrow points from the side of the green brick towards the center of the red brick.
  - Step 3:** The structure is fully assembled. It consists of a red 1x8 brick at the base, a white 1x8 brick in the middle, and a green 1x8 brick at the top. A green arrow points from the side of the green brick towards the center of the white brick. To the right of the completed structure, the text "2x" is written.
